

## TIPOLOGIA PAVIMENTO - MOD. ANTISCIVOLO R12

FLOOR TYPE - MOD. NON-SLIP R12

### PAVIMENTO CON LAMIERA INOX ANTISCIVOLO

- Lamiera inox spessore 15/10mm
- Finitura superficiale rigidizzata satinata
- Elevata resistenza allo scivolamento (Classe R12)
- Adatta anche in ambienti bagnati

### FLOOR WITH NON-SLIP STAINLESS STEEL SHEET METAL

- 15/10mm thick stainless steel sheet
- Patterned sheet metal with satin finish
- High slip resistance (R12 class)
- Also suitable for wet environments

| TEST AT "INCLINED PLANE" |   | Commercial areas |
|--------------------------|---|------------------|
| Assessment groups        | Angle of inclination                            |                  |
| R9                       | >6° – 10°<br>low coefficient of adhesion        |                  |
| R10                      | >10° – 19°<br>normal coefficient of adhesion    |                  |
| R11                      | >19° – 27°<br>increased coefficient of adhesion |                  |
| <b>R12</b>               | >27° – 35°<br>high coefficient of adhesion      |                  |
| R13                      | >35°<br>very high coefficient of adhesion       |                  |
